In this case, select Learn more under Location

App diagnostics

A problem has been detected!

Location

Location

You must allow the application to access the phone's position so that it can detect and analyze your routes. In the phone settings, three options are available: (1) never, (2) ask next time, (3) while using the app and (4) always. It is necessary to select option (4) always otherwise the application will not work.

Allow access to the location.

The app does not record your trips?

Follow the instructions and select Allow the access

STEP n°4

Go in your phone Settings and select Your App Location setting

App explanation: "To enable automatic trip detection and driving analysis without having to manipulate your phone, select the option "Always allow". Good road ... "
