## LOCATION

In this case, select Learn more under Location

#### App diagnostics

#### 1 problem has been detected!

The application requires your intervention to adapt the settings of your phone. In order for the app to record your trips, you need to follow the directions below.

#### Location

#### Location

You must allow the application to access the phone's position so that it can detect and analyze your routes. In the phone settings, four options are available: (1) never, (2) ask next time, (3) while using the app and (4) always. It is necessary to select option (4) always otherwise the application will not work.

#### ALLOW ACCESS TO THE LOCATION

The application automatically detects the beginning and end of a trip without using the GPS sensor. The GPS sensor is only turned on if a motorized trip has been detected. This helps to minimize the battery drain.

#### The app does not record your trips?

If the application does not work after following the recommendations above, you can contact us by email. It's fast and the email will contain all the necessary information to analyze the origin of your problem.
