	CONFIGURING THE BEAC	CON
<b>My vehicle</b> Volvo Xc60 (2e GEARTRONIC 8	<b>e - 6</b> Generation) II T5 AWD 250 MOMENTUM	:

- An alert message is displayed as long as the beacon has not been linked to the vehicle
- To perform this operation, click on CONFIGURING THE BEACON

### A screen appears explaining the prerequisites for linking a beacon to the vehicle

If all the conditions are ok, click on BEGIN

# Enter the ID that you can read on the beacon and click on VALIDATE

### The application verifies that the ID exists, that the corresponding beacon is on and that it is near the phone

This operation takes a few seconds

### If the application detects the beacon, a success message appears

If you want to link the beacon to the vehicle, click on CONFIRM

**FINISH** 

- The application confirms that the beacon is now linked to the vehicle
- To complete the process, click on
- This choice is saved on the application
